

AMOS .O. ADEWOPO

DevOps Engineer | Site Reliability Engineer | Cloud Engineer | Web & Mobile Developer
Plano, TX 75023 ☎ (409)655-2769 ✉ amosadewopo@bonhomieinc.dev

Professional Objective:

Dynamic DevOps Engineer with 9+ years of versatile experience spanning web and mobile development, ethical hacking, and database engineering. Adept at orchestrating and optimizing software delivery pipelines on cloud platforms, leveraging expertise in CI/CD methodologies and a suite of DevOps tools such as Kubernetes, Docker, Ansible, and Jenkins. Proven track record of driving efficiency and reliability through automation and continuous improvement. Skilled in front-end and back-end technologies including HTML, CSS, JavaScript, React, Node.js, and MongoDB. Seeking to apply comprehensive skills in micro-services architecture, containerization, and infrastructure as code to propel innovation and growth in a DevOps Engineering role.

CORE COMPETENCIES

- | | | |
|-----------------------|-----------------------|----------------------|
| ✓ Kubernetes | ✓ Terraform | ✓ Web development |
| ✓ Docker | ✓ Git | ✓ Mobile development |
| ✓ Dynatrace | ✓ Security | ✓ CI/CD Pipeline |
| ✓ Ansible | ✓ Incident Management | |
| ✓ Azure | ✓ Logging | |
| ✓ AWS | ✓ Service Mesh | |
| ✓ Jenkins | ✓ Database | |
| ✓ Monitoring/Alerting | ✓ Ethical Hacking | |

Technical Skills:

Development Tools & Languages: HTML, CSS/SCSS, Javascript, Typescript, React, React Native, NodeJS, Maven, SonarQube, Nexus, JFrog.

Web Servers & Application Servers: Tomcat, Wildfly/JBoss, Apache HTTP, NGINX

Monitoring & Performance Tools: Dynatrace, Prometheus, Grafana, Elasticsearch, Logstash, Kibana.

DevOps & CI/CD: Jenkins, CI/CD, Git/Github, GitActions, Jira

Database & Query Languages: MongoDB, PostgreSQL, MySQL

Other Tools & Technologies: IDEs (Integrated Development Environments), Kali Linux.

EDUCATION

Bachelor of Science

Computer Science

Tai Solarin University

Professional Certifications

Dynatrace Certified Platform Associate

CKA: Certified Kubernetes Administrator

AWS Certified Security Specialty

AWS Certified Solutions Architect Associate

CompTIA Security+ Certification

(ISC)² Certified in Cybersecurity (CC)

Cisco Endpoint Security

PROFESSIONAL EXPERIENCES & PROJECTS

Sr DevOps Engineer

Landmark Technologies

June 2021 – June 2026

- Demonstrated expertise in cloud infrastructure management on both Azure and AWS platforms, including IAM, EC2, RDS, S3, and EKS, ensuring high availability, scalability, and security of applications and services.
- Implemented and optimized CI/CD pipelines using Jenkins, Git/GitHub, and GitActions, enabling automated build, test, and deployment processes for faster time-to-market and improved development efficiency.
- Leveraged Docker and Kubernetes for containerization and orchestration of applications, ensuring consistency and reliability across diverse environments.
- Utilized Ansible for infrastructure as code (IAC) automation, reducing manual effort and ensuring consistent configuration across development, testing, and production environments.
- Implemented monitoring and alerting solutions using Dynatrace, Prometheus, and Grafana, enabling proactive identification and resolution of performance issues and bottlenecks.
- Led incident management processes, conducting root cause analysis (RCA) and implementing corrective actions to minimize service disruptions and improve system reliability.
- Collaborated closely with development teams to optimize application performance and architecture, ensuring alignment with business requirements and best practices.
- Implemented robust security measures, including role-based access control (RBAC), encryption, and security groups, to protect against security threats and ensure compliance with industry standards.

DevOps Engineer

Zoom Technology

June 2019 - May 2021

- Collaborated with DevOps team to manage, monitor, and configure AWS cloud infrastructure within environment
- Facilitated UAT validation meetings to clarify functionality and provide insight on common errors & concerns
- Provisioned infrastructure utilizing terraform for different internal environments
- Managed and configured version control tool Git/GitHub for company environment
- Configured and provided access permissions to developers over branches
- Created repositories, organizations, projects, and branches
- Integrated and configured webhooks with CI/CD tool for automation
- Performed daily platform monitoring health checks while determining root cause of issues in route to implementing effective corrective actions and solutions to ensure continuous improvement
- Managed and troubleshooted technical issues based off end-user ticketing submissions
- Utilized knowledge of scope coordination and analysis, work package reviews, project schedule development, cost engineering, critical path analysis, coordination in ensuring that each deployment is accurate and on time
- Personally involved in UAT testing, final testing, troubleshooting, configurations management and server management.

Full-Stack Developer

Emporium Tech

Jan 2016 - March 2019

- Developed and maintained web and mobile applications using a full stack of technologies, including HTML, CSS/SCSS, JavaScript, TypeScript, React, React Native, Node.js, and various database technologies.
- Implemented responsive design principles to ensure optimal user experience across devices and screen sizes.
- Collaborated with cross-functional teams to gather requirements, plan project timelines, and deliver high-quality solutions.
- Designed and implemented RESTful APIs for communication between front-end and back-end systems.

- Utilized version control systems such as Git/GitHub for code management and collaboration.
- Integrated third-party APIs and services to extend application functionality and enhance user experience.
- Conducted thorough testing and debugging to identify and resolve issues, ensuring robust and reliable applications.
- Implemented security best practices to protect against common vulnerabilities and ensure data integrity and confidentiality.
- Contributed to continuous improvement initiatives, including code refactoring, performance optimization, and adoption of best practices and emerging technologies.
